

WHAT'S ABOUT TO HAPPEN  
TO YOUR ELECTRICITY COSTS  
WILL SHOCK YOU.

YOU HAVE THE POWER TO STOP IT.

On May 1st, the government plans to pull the plug on our reliable, at-cost electricity. 67% of Ontarians believe the sell-off of public hydro is a bad idea, and they're right. After all, deregulation left California struggling with black-outs and rate increases of up to 500%.

So, like most of us, you must be wondering why on earth the Conservatives would take us down a path that threatens our economic and environmental well-being. The answer is simple. It's about money – and it's going to be coming out of your pocket. Unless we act now, before it's too late.

ELECTRICITY DEREGULATION  
CAN BE STOPPED.  
IT'S YOUR CALL:
